

ArogyaSecure Health Insurance - Policy Handbook

Policy Code: ASH-FAMILY-2026

Effective version: 1 July 2026

1. Scope of Cover

In-patient hospitalization is covered when the insured is admitted for at least 24 consecutive hours, except for listed day-care procedures. Covered expenses may include room rent, nursing charges, surgeon fees, operation theatre charges, diagnostic tests directly related to the hospitalization, and prescribed medicines used during admission.

2. Waiting Periods

General hospitalization claims become eligible after 6 completed policy months. Pre-existing diseases have a waiting period of 36 months. Maternity benefits begin after 24 completed policy months. Accidental hospitalization has no initial waiting period when the policy is active on the date of accident.

3. Room Rent and ICU

Standard room rent is limited to 2% of the sum insured per day. ICU room charges are limited to 4% of the sum insured per day. Charges above these limits may be proportionately reduced unless the selected plan explicitly removes room-rent limits.

4. Cashless Treatment

Cashless treatment is available only at empanelled network hospitals and requires insurer or third-party administrator authorization. Planned hospitalization should be pre-authorized at least 48 hours before admission. Emergency hospitalization should be notified within 24 hours of admission.

5. Required Documents

A reimbursement claim should include the completed claim form, original final hospital bill, payment receipt, discharge summary, doctor prescription, diagnostic reports, pharmacy bills, identity proof, cancelled cheque or bank proof, and a copy of the insurance card or policy schedule.

6. Exclusions

Purely cosmetic treatment, non-prescribed vitamins, experimental treatment without approval, self-inflicted injury, treatment related to unlawful activity, and non-medical consumables are excluded unless specifically stated otherwise. Dental treatment is excluded except when required because of an accidental injury.

7. Day-care Procedures

Listed day-care procedures do not require 24-hour admission. Examples include cataract surgery, dialysis, chemotherapy, radiotherapy, tonsil surgery, and certain endoscopic procedures, subject to medical necessity and policy limits.

8. Claim Intimation

For planned admission, notify the insurer before hospitalization. For emergency hospitalization, notify within 24 hours. Reimbursement documents should be submitted within 30 days from discharge unless a documented medical reason prevents timely submission.

9. Information Not Stated

If a treatment, sub-limit, hospital, disease-specific exception, or special benefit is not stated in the supplied documents, the assistant must not assume coverage and should report that the information is unavailable in the provided documents.
